

Getting Started with Podcasting

Directions

The below will show you how to power on all the devices and prepare to record your audio or video lessons.

Power

1. Main power Switch for (microphones, Rodecaster, ATEM Mini Switching device, Camera 2)

2. Next, on Rodecaster, press red power button on the rear of the unit.
 - a. Verify sound settings are similar to the photo for 1-4

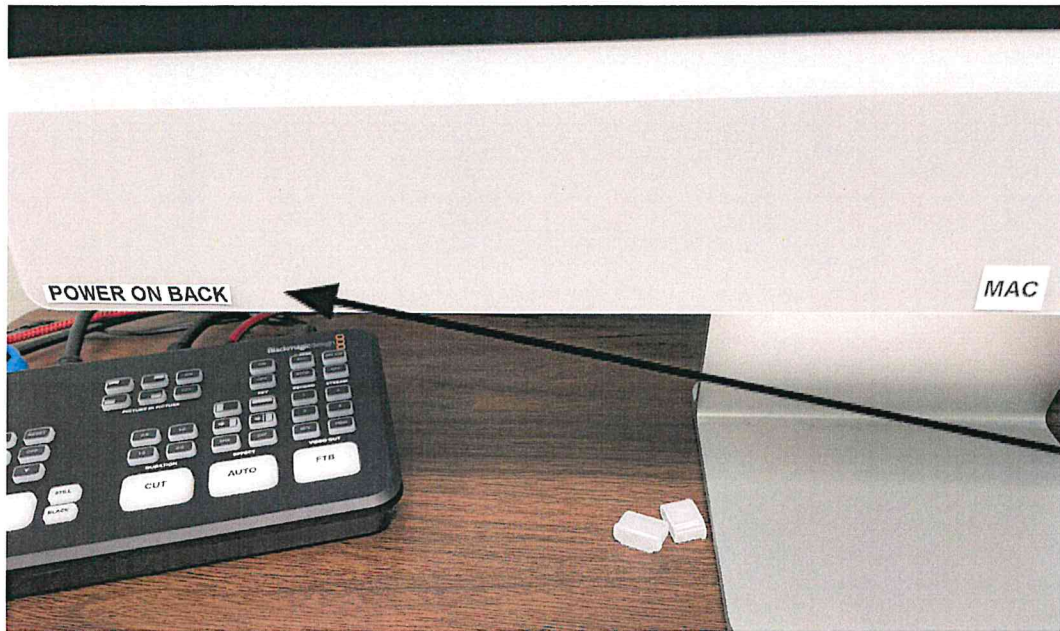

3. The ATEM Mini Pro HDMI video switcher will power on with the main power from step 1 above. Verify you see lights.

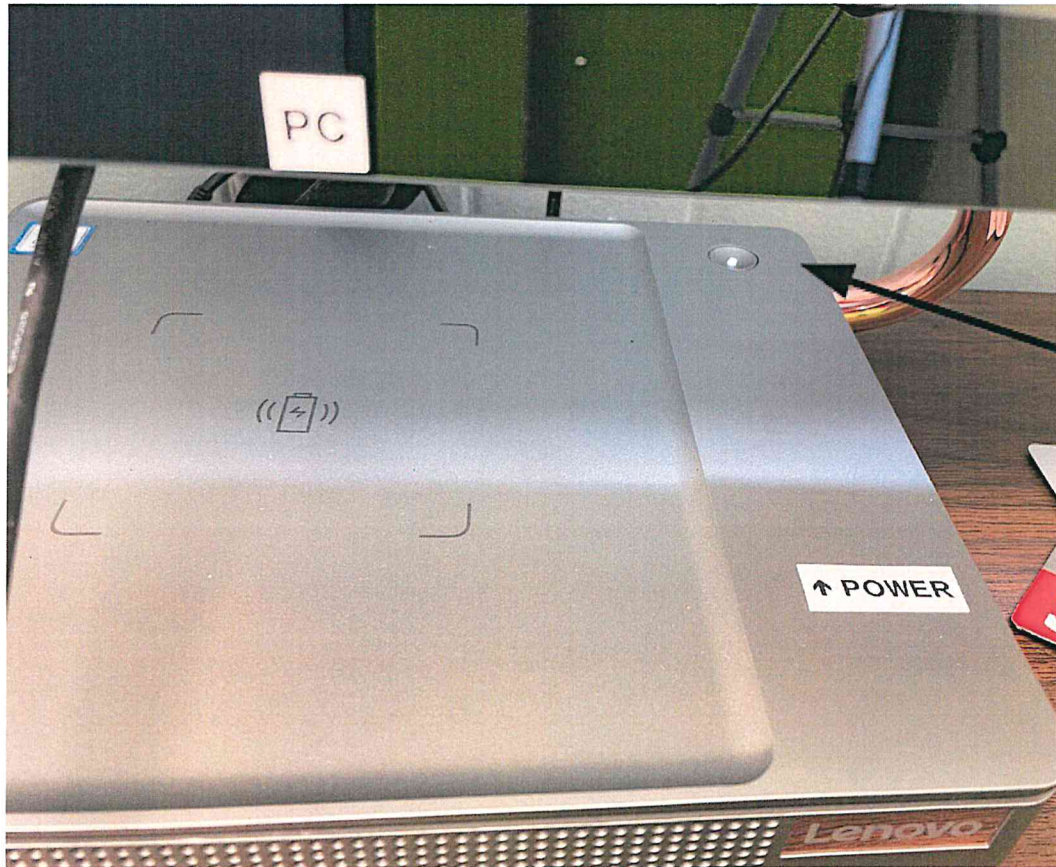

4. Camera power (press and hold a minimum of 3 seconds)

5. Mac Power is located on the rear of the monitor

6. PC Power located on right top of stand

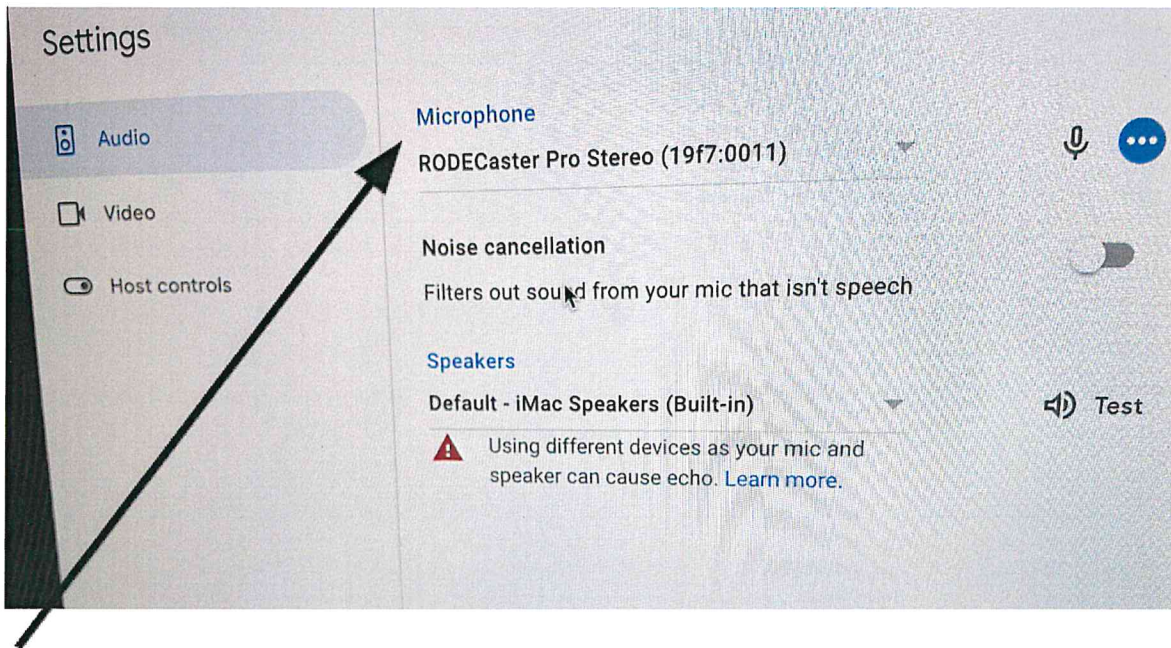

Next Steps (From the Mac Device):

1. At this point all of your devices should be powered on and ready for use.
2. Decide what channel you want to post to: Zoom, Facebook, YouTube, Loom, screen castify or other.
3. Once you have your selected media opened and ready to stream or record, you must verify you have the correct outputs selected.
4. Find the settings for the platform you selected (shown below is google meet)

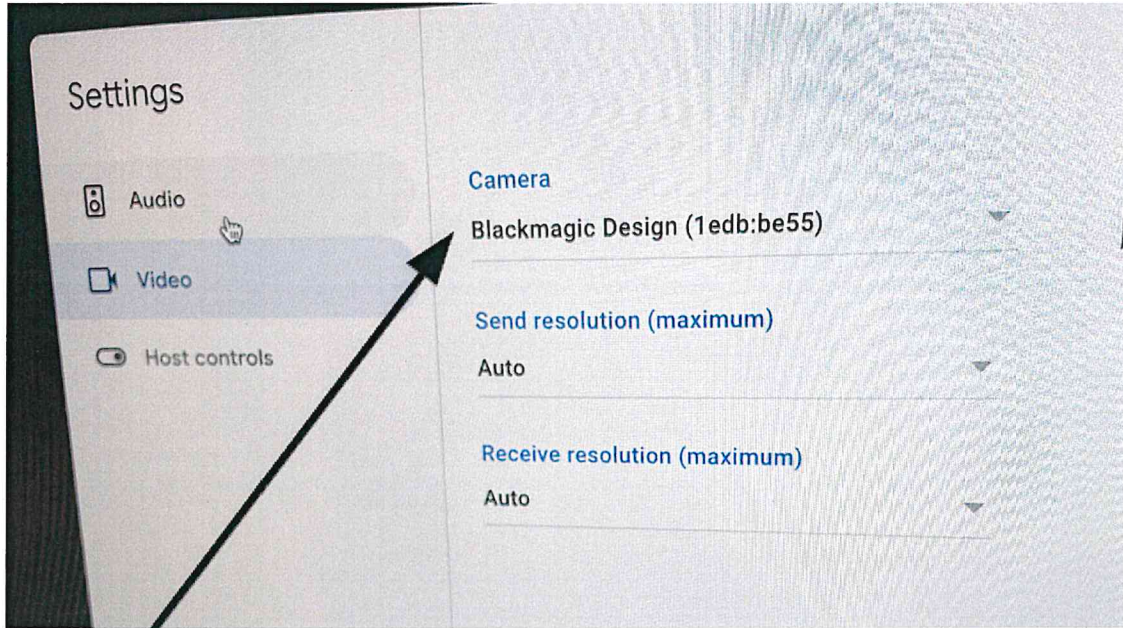

Choose Audio Output:

1. Select RODECaster Pro for Microphone Output

Choose Video Output:

1. Select Blackmagic Design for camera output

~At this point setup is complete and you are setup and ready to record~

How to switch video/camera output

- 1 From the ATEM Mini Pro Switching device select desired video output
This is what your end user will see on their side

1. Camera 1 (Tripod)
2. Camera 2 (tabletop)
3. PC Screen
