

## Adjust Cameras on Quad Screen DX / DL1 DVR to show IP Camera

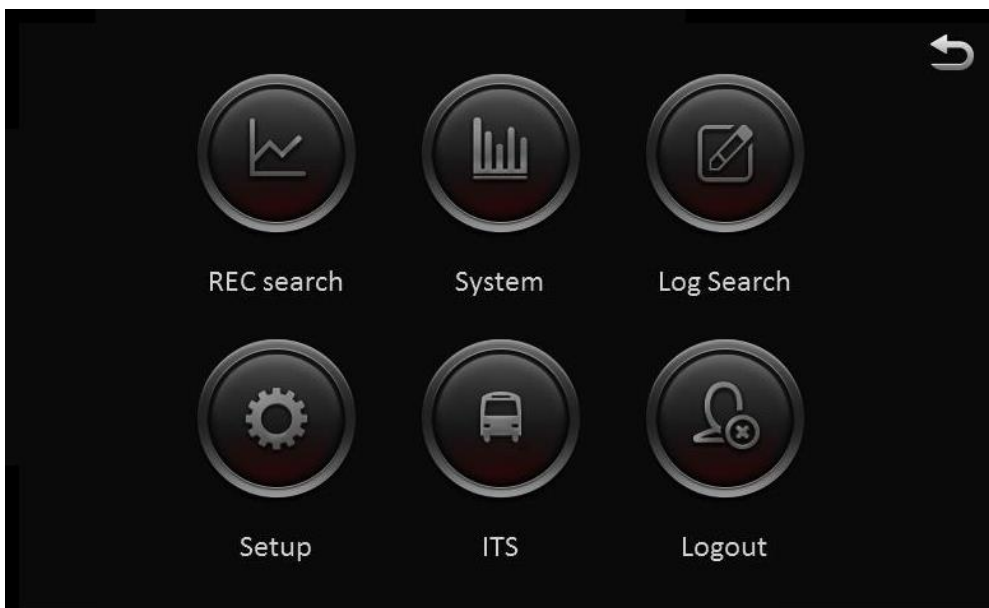

Enter DVR Menu by pressing Set up on remote

User name admin  
Password eagle

To enter the main menu screen as below

Then Using the arrows select Setup menu as per image below

### In the Surveillance settings

Now Under Live View Tab at the side then in Preview. Now you can change the Startup screen view (Default setting is Quad) then tick the required channels to show in Quad screen mode below by ticking the correct channel number.

To get the IP camera (camera 5 to be selected press the down arrow above the save button, untick channel 4 then tick channel 5

Now you will have Cameras 1,2,3 and 5 on the quad screen

When you have set to the correct setting you can then press save and exit the menus.
