

Using Easycheck Application to View Recorded footage

You will need to pair the device via the WiFi connection from the Tablet or Smartphone.

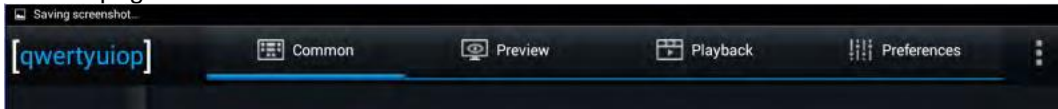

1. Initial Login screen as shown on IOS devices. Now Select the paired device.

2. Using username and password to log in to the selected device. Username is admin, Password is eagle.

3. On the Top bar on the app you will see Playback option select this to enter the record search page.

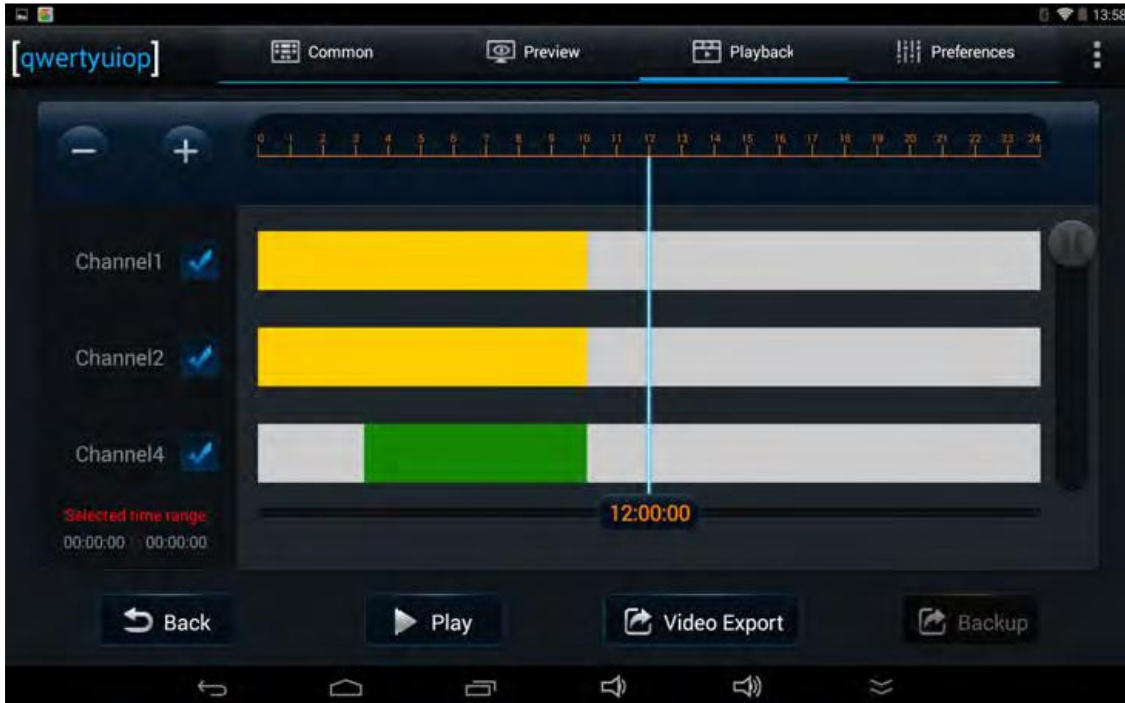

4. Now on the Record search page you will see the calendar now you will need to select that day that you want to view / export footage from.

5. Now you can select which camera feed you want to view in playback

- Here you will get the time line so you can select the start time to view from or to export the footage from.

- Playback will start for the selected channel once play has been selected. Using the controls at the bottom of the page.
