

## Pairing the 0-876-08 / 09 With Tablet / Smartphone

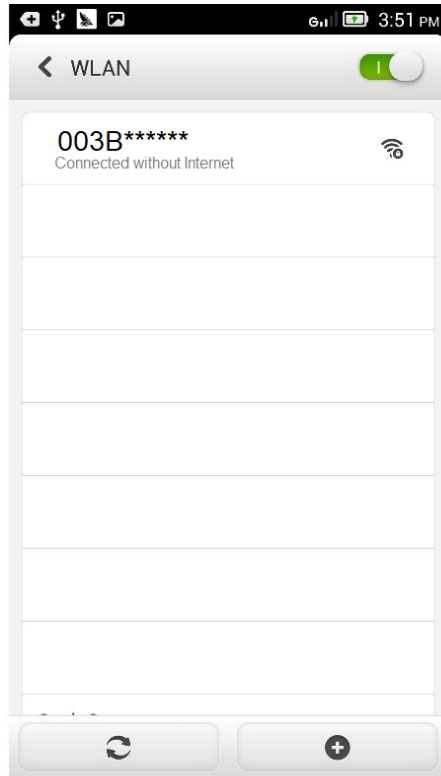

1. Start with the Dashcam switched off.
2. Have the Smartphone / Tablet within WiFi Range (Up-to 2 Metres away) of the Dashcam.
3. As you will be connecting via a WLAN (Wireless Local Area Network) connection.
4. Turn the Dashcam on using the Ignition then wait until you hear the dashcam make a clicking sound, usually about 30 seconds once powered on.
5. The LED on the dashcam will now change from RED to Green after about 10 seconds the Dashcam LED will start to Flash Green (This is when the Dashcam is in WiFi Pairing mode)
6. You will now have about 30 Seconds to Pair with the Dashcam otherwise you will need to repeat steps 1-5
7. Now on the Tablet or Smartphone Settings you can now Start the WLAN connection process.
8. Open the WLAN connection

- It will show the connection as the Dashcam serial number (003B\*\*\*\*\*) Select the serial number to establish the connection.

- Once connected it will show on the Tablet / Smartphone as Dashcam serial number, then Connected without internet.

- Now you can open the Easycheck APP on the Tablet / Smartphone.
