

Setting Up Panic Button / LED Panel for DX / DL 1 DVR

1. From the DVR Login Page enter the Username and Password then select Login
This can be done on the Remote or using Easycheck depending on DVR model.

2. With the Remote Version Select Setup / Easy check model is slightly Different.

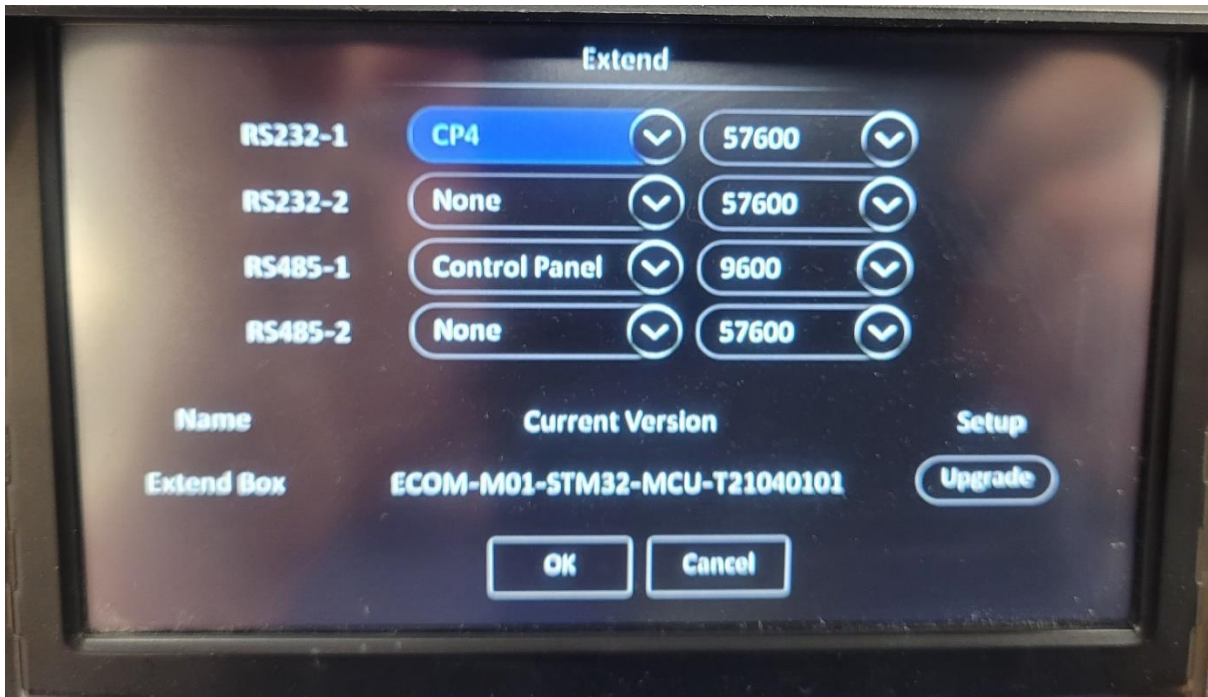

- Once in the Setup menu you will need to go to Collection Settings, Then In serial Port Settings, Here you will need to adjust to allow the panic button to be set up.

- Change to below setting then enter the set up for the Port.

5. Here you will need to set up the RS232 Port and The RS485-1 Port to the settings as below.

6. Now this has been set up Select ok at the bottom of the screen.

7. Now you will come back to the serial port settings Page now select Save.

8. Now you can exit the menus and restart the DVR.-
